Eval. Notes: Perma-Fix of Florida, Inc. (Perma-Fix, the facility) was inspected on June 24, 2021. A site visit was also conducted on August 31, 2021, for records review. Mr. Randy Self, General Manager (Perma-Fix) was present during June inspection. Perma-Fix's Mr. David Fendelander (EHS Manager), Mr. Lason Kirkland (Industrial Operations Manager), and Mr. John Cochran (Transportation Manager) were present during the August records review. Perma-Fix was last inspected jointly by the Department's Hazardous Waste Program and U.S. Environmental Protection Agency on November 21, 2019. Perma-Fix was issued RCRA/HSWA permit number 17680-011-HO on June 3, 2020, with an expiration date of June 8, 2025. The permit is for the operation of a hazardous waste treatment and storage facility consisting of a 3,000-gallon aboveground storage tank (AST), three container storage areas and three miscellaneous treatment units. Perma-Fix is a Large Quantity Generator (LQG) of hazardous waste, a Used Oil - Used Oil Filter Transporter and Transfer Facility, a Universal Waste (Lamps, Batteries, Devices, Aerosol Cans) Transporter and Transfer Facility, and a Used Oil Marketer. The facility's processes include liquid and sludge bulking, scintillation vial and other small container crushing and shredding, repackaging of solid wastes contaminated by hazardous wastes, stabilization of wastes in containers, thermal desorption and/or chemical oxidation, non- elementary neutralization, used oil handling, petroleum contact water (PCW) transportation, consolidation and storage of universal wastes, radiological screening, and chemical analyses of wastes. The facility receives, temporarily stores and transfers radioactive and mixed wastes in accordance with US Nuclear Regulatory Commission (NRC) and RCRA requi													

Violation

Activity Location: FLType: 268.E

Scheduled Compliance Date:Determined Date: 06/24/2021

Former Citation:268.50(a)(2)(i)Actual Compliance Date: 09/08/2021

Determined By Agency: STATE

RTC Qualifier: UNVERIFIABLE

Responsible Agency: STATE

Sequence Number: 52

Viol. Notes: Processing and Storage Building: the facility failed to mark one 55-gallon drum of F003/F005 hazardous waste solids received from an off-site generator with the hazards of the contents. | No further action is required. The facility labeled the container during the inspection.

No Linked Enforcements

Note: Penalty information associated with an enforcement action is reported with the enforcement action. For enforcement actions associated with multiple violations, the penalty information will be reported with each violation, however, the penalty is only assessed once, regardless of the number of violations associated with the enforcement.

Viol. Notes: Pursuant to RCRA Permit 17680-011-HO, Part II Subpart B.2.1.- Container Storage Areas/Unit, the Permittee is allowed to store the wastes listed in Attachment A of this permit only in the Processing and Storage Building (PSB), Treatment and Operations Building (TOB), and in the Liquid Scintillation Vial (LSV) Processing and Waste Storage Warehouse. Containers must conform to D.O.T. requirements. If a container holding hazardous waste is not in good condition, or begins to leak, the waste shall be transferred to another container that is in good condition [40 C.F.R. 264.171] or it will be over-packed. Containers shall be kept closed, except when adding or removing waste and be handled in a manner that will not allow the containers to rupture or leak [40 C.F.R. 264.173].

Eval. Notes:	Perma-Fix of Florida, Inc. (Perma-Fix) was inspected on May 4, 2017. A visit to the facility was also conducted on May 17, 2017. Kurt Fogleman, EHS Manager (Perma-Fix); Dwayne Singleton, Industrial Coordinator (Perma-Fix); Randy Self, Site Nuclear Manager (Perma-Fix); and Pam Fellabaum (DEP) were present during the May 4 visit. Mr. Fogleman and Mr. Singleton, and Ken Justice, Lab Manager (Perma-Fix) were present during the May 17 visit. Perma-Fix was last inspected by the Department's Hazardous Waste Program on August 14, 2014. USEPA inspected the facility on March 3, 2015. Perma-Fix was issued RCRA/HSWA permit number 17680-011-HO on May 27, 2015, with an expiration date of June 8, 2020. The permit is for the operation of a hazardous waste treatment and storage facility consisting of a 3,000-gallon aboveground storage tank (AST), three container storage areas and three miscellaneous treatment units. The facility has been issued EPA/DEP identification number FLD 980 711 071. Please use this number on all hazardous waste related correspondence with the Department. Perma-Fix is a Large Quantity Generator (LQG) of hazardous waste, a Used Oil - Used Oil Filter Transporter and Transfer Facility, a Universal Waste (Lamps, Batteries, Devices, Pharmaceuticals) Transporter and Transfer Facility, and a Used Oil Marketer. The facility's processes include liquid and sludge bulking, scintillation vial and other small container crushing and shredding, repackaging of solid wastes contaminated by hazardous wastes, stabilization of wastes in containers, thermal desorption and/or chemical oxidation, non-elementary neutralization, used oil handling, petroleum contact water (PCW) transportation, consolidation and storage of universal wastes, radiological screening, and chemical analyses of wastes. Eval. Notes:	Perma-Fix of Florida, Inc. (Perma-Fix) was inspected on August 14, 2014, by the Department of Environmental Protection's (DEP) Hazardous Waste Section as an unannounced compliance inspection. Heather Hahn and Hans Schneider with DEP also participated in the inspection. Perma-Fix is a Large Quantity Generator and a permitted hazardous waste storage facility. The facility's processes include liquid and sludge bulking, scintillation vial and other small container crushing and shredding, repackaging of solid wastes contaminated by hazardous wastes, stabilization of wastes in containers, thermal desorption and/or chemical oxidation, used oil handling, petroleum contact water (PCW) transportation and consolidation and storage of discarded mercury-containing devices. Perma-Fix was issued permit number 17680-010-HC on September 16, 2010. The permit is for the operation of a hazardous waste treatment and storage facility consisting of a tank, two container storage areas, and two miscellaneous treatment units. The facility was last inspected on September 17, 2013. Operations have not changed since then, and the same procedures are in place and being implemented. Descriptions of permitted areas and processes are detailed in previous inspection reports and will not be repeated in this report. The facility is surrounded by a barbed wire fence with restricted access. Adequate signage was posted around the perimeter of the facility. PROCESSING AND STORAGE BUILDING ----- The Processing and Storage Building (PSB) is a permitted hazardous waste container and tank storage area, as well as a fuel-blending location that includes phase separation treatment. The hazardous waste containers that were examined were properly labeled and closed and had been dated with the storage start date. All satellite containers of hazardous waste in the fuel blending section of the permitted storage area were properly closed and labeled. T

Eval. Notes:	Perma-Fix of Florida, Inc. (Perma-Fix) was inspected on November 15, 2011, as an unannounced hazardous waste compliance inspection. This inspection was conducted jointly with Tony Jenkins of the Environmental Protection Agency (EPA). Heather Hahn, DEP Inspector, also participated in the inspection. An EPA inspection report will be issued seperately. PROCESSING AND STORAGE BUILDING ----- The Processing and Storage Building (PSB) is a permitted hazardous waste container and tank storage area, as well as a fuel-blending location that includes phase separation treatment. The hazardous waste containers that were examined were properly labeled and closed and had been dated with the storage start date. All satellite containers of hazardous waste in the fuel blending section of the permitted storage area were properly closed and labeled. This included one satellite aerosol can waste drum, one drum for storage of pumping equipment, and one drum for solids from the fuel blending process. TREATMENT AND OPERATIONS BUILDING ----- Perma-Fix Analytical Services occupies the southeast corner of the TOB. The laboratory performs fingerprint analyses on each incoming waste stream to confirm that waste received by the facility conforms to the initial waste profile. Laboratory operations generate waste acid, solvents, liquids, glass, and plastic that are managed as hazardous waste and are transferred to the LSF processing area for liquid recovery. The laboratory 90-day accumulation area is located just outside the lab in the east half of the TOB. At the time of the inspection, there were three 55-gallon drums (acid waste, flammable liquid waste, and waste vial solids) that were properly labeled, dated, and closed. LSV PROCESSING AND WASTE STORAGE BUILDING ----- The Waste Storage Warehouse (WSW) contains a permitted haz

Eval. Notes:	Perma-Fix of Florida, Inc. (Perma-Fix) was inspected on June 23, 2011, by the Department of Environmental Protection (DEP) Hazardous Waste Section as an unannounced compliance inspection. Yasmine Enriquez and Scott Jonhson of DEP's Air Section were also present during the inspection. Perma-Fix is a Large Quantity Generator and a permitted hazardous waste storage facility. The facility's processes include liquid and sludge bulking, scintillation vial and other small container crushing and shredding, repackaging of solid wastes contaminated by hazardous wastes, stabilization of wastes in containers, thermal desorption and/or chemical oxidation, used oil handling, petroleum contact water (PCW) transportation and consolidation and storage of discarded mercury-containing devices. Perma-Fix was issued permit number 17680-010-HC on September 16, 2010. The permit is for the operation of a hazardous waste treatment and storage facility consisting of a tank, two container storage areas, and two miscellaneous treatment units. The facility was last inspected on December 7, 2009. Operations have not changed since then, and the same procedures are in place and being implemented. Descriptions of permitted areas and processes are detailed in previous inspection reports and will not be repeated in this report. Process descriptions are noted in previous reports and will not be repeated in this inspection report. PROCESSING AND STORAGE BUILDING ----- The Processing and Storage Building (PSB) is a permitted hazardous waste container and tank storage area, as well as a fuel-blending location that includes phase separation treatment. The hazardous waste containers that were examined were properly labeled and closed and had been dated with the storage start date. Eval. Notes:	Perma-Fix of Florida, Inc. (Perma-Fix) is a Large Quantity Generator and a permitted hazardous waste storage facility. The facility's processes include liquid and sludge bulking, scintillation vial and other small container crushing and shredding, repackaging of solid wastes contaminated by hazardous wastes, stabilization of wastes in containers, thermal desorption and/or chemical oxidation, used oil handling, petroleum contact water (PCW) transportation and consolidation and storage of discarded mercury-containing devices. Perma-Fix was issued permit number 17680-009-HC on September 15, 2006. The permit is for the operation of a hazardous waste treatment and storage facility consisting of a tank, two container storage areas, and two miscellaneous treatment units. The facility was last inspected on April 21, 2009. Operations have not changed since then, and the same procedures are in place and being implemented. Descriptions of permitted areas and processes are detailed in previous inspection reports and will not be repeated in this report. PROCESSING AND STORAGE BUILDING (PSB): The hazardous waste containers that were examined were properly labeled, closed, and had been dated with the storage start date. Pallets are used for stacking drums a maximum of two high, with a maximum of four 55-gallon drums per pallet. The majority of waste consolidation and fuel blending occurs in zone one of the PSB building. Hazardous wastes that arrive in drums are consolidated into tanker trucks to be used for fuel. Containerized hazardous wastes that contain a high percentage of solids or sludge are sometimes blended with liquids from one of the 550-gallon totes to obtain a mixture that can be pumped into a tanker truck. The mixture is then manifested to Energis, LLC. Sludges/solids are consolidated into 55-gallon drums and disposed of as hazardous waste. One satellite container used for equipment storage was not in use but was open [40 CFR 262.34(c)(1)(i)] and

Eval. Notes:	PROCESSING AND STORAGE BUILDING ----- The Processing and Storage Building (PSB) is a permitted hazardous waste container and tank storage area, as well as a fuel-blending location that includes phase separation treatment. The hazardous waste containers that were examined were properly labeled and closed and had been dated with the storage start date. Pallets are used for stacking drums a maximum of two high, with a maximum of four 55-gallon drums per pallet. A 3,000-gallon AST is located in the approximate center of the permitted container storage area. The tank has appropriate secondary containment and a sump to contain any spillage. At the time of this inspection, the AST was empty and has not been used to store any waste since it was installed. The majority of waste consolidation and fuel blending occurs in the east side of the permitted TSD building. Hazardous wastes that arrive in drums are consolidated into tanker trucks for fuel blending. Containerized hazardous wastes that contain a high percentage of solids or sludge are sometimes blended with liquids from one of the 550-gallon totes to obtain a mixture that can be pumped into a tanker truck. The mixture is then manifested to Energis, LLC. Sludges/solids are consolidated into 55-gallon drums and disposed of as hazardous waste. All containers of hazardous waste in the fuel blending section of the permitted storage area were properly closed, labeled, and dated. Subpart BB equipment was properly working at the time of inspection. TREATMENT AND OPERATIONS BUILDING ----- The permitted storage area has seven different zones of secondary containment inside the Treatment and Operations Building (TOB). A maximum volume of 35,200 gallons of hazardous waste can be stored in the TOB as stipulated in Attachment B of the permit. At the time of the inspection the facility was not exceeding the maximum volume o
